MT Cloud

Construction Industry App Stacks

Take running your business
to the next level

If you are an existing cloud user or looking to adopt a cloud package to run your business, apps can not only assist your business run more smoothly but give you the foundations to grow your business too.

What type of apps are there?

- **Job Management** – Quote for work, maintain the costs against the job and then produce an invoice. All in one place, with the ability to understand which jobs are profitable.
- **Payment Services** – Take money on the job, improve cashflow and reduce bad/late payers.
- **Automated Expenses** – Process purchases quickly and store using the cloud.

How can I learn which ones can help me?

- Call MT Cloud and arrange a no obligation discovery meeting.
- During this, we will begin to build a picture of you, your business and your goals. We will discuss any problems you are having or foresee and gather useful information to assist us to be able to design something that can help you run your business and achieve your goals.

How much do they cost?

- There is a range of costs depending on your budget and needs, which we can talk through with you during a discovery meeting.

How do I learn how to use them?

- One of our dedicated MT Cloud App Teachers will provide training on the majority of options discussed. For some bespoke packages the app provider will train you, along with a member of our team – to enhance knowledge and to allow us to provide support in the future, if you ever require it.

From one-man-bands to multi-location traders, we can tailor an app stack to suit your requirements.

Gain efficiency with job management apps

- Save hours of admin by quoting, billing and keeping track of payments from a mobile phone or tablet.
- Automatically sync each job with accountancy software.
- Manage the workforce smartly with easy employee scheduling and tracking.
- Stay on top of each job, from quoting work to completion invoices.
